SECTION 4: FIRST AID MEASURES

4.1. Description of first aid measures

General

No hazards which require special first aid measures.

Inhalation

If overexposed to vapors, mist or dust above published exposure limits, move to fresh air. If symptoms persist, GET IMMEDIATE MEDICAL ATTENTION. If not breathing, administer CPR until help arrives or the victim starts to breathe on their own. If breathing is difficult, give oxygen by trained personnel.

Skin Contact	<i>Wash skin immediately with soap and plenty of water while removing all contaminated clothing and shoes. Get medical attention if irritation develops or persists. Wash contaminated clothes before reuse.</i>
Eye Contact	<i>Rinse thoroughly with plenty of water for at least 15 minutes and consult a physician. Remove contact lenses, if present and easy to do. Continue rinsing. Seek medical advice immediately.</i>
Ingestion	<i>Rinse mouth with water if conscious. Do not induce vomiting. Potential for aspiration if swallowed. Material may enter the lungs during vomiting. Never give anything by mouth to an unconscious person. GET IMMEDIATE MEDICAL ATTENTION.</i>

4.2. Most important symptoms and effects, both acute and delayed

No information available

4.3. Indication of any immediate medical attention and special treatment needed

Treat symptomatically.

SECTION 5: FIREFIGHTING MEASURES**5.1. Extinguishing media**

Suitable Extinguishing Media: Carbon dioxide (CO₂), foam, dry chemical, water spray.

Unsuitable extinguishing media: Do not use solid water stream as it may scatter and spread fire.

5.2. Special hazards arising from the substance or mixture

Hydrochloric acid, carbon monoxide, carbon dioxide, and organic products of decomposition may be released in case of fire. Closed container may rupture if strongly heated. Empty containers may have some flammable product residue (liquid and/or vapor). Do not pressurize, cut, weld, braze, solder, drill, grind, or expose these containers to heat, flame, sparks, static electricity, or other sources of ignition as the container may explode causing injury or death. Empty containers should be completely drained, properly bunged and promptly returned to a drum re-conditioner or properly disposed.

5.3. Advice for firefighters

As in any fire, wear self-contained breathing apparatus pressure-demand, MSHA/NIOSH (approved or equivalent) and full protective gear.

Flammable liquid. Vapors can form an ignitable mixture with air. Vapors can flow along surfaces to a distant ignition source and flash back. Closed containers may rupture when exposed to extreme heat.

SECTION 6: ACCIDENTAL RELEASE MEASURES

6.1. Personal precautions, protective equipment and emergency procedures

Assure sufficient ventilation.

Use personal protective clothing.

Use NIOSH approved respiratory protection if exposed to vapors, dust, mist, or aerosols above published exposure limits.

6.2. Environmental precautions

Product sinks in water. Prevent spilled material from entering waterways or soil, The established CERCLA Reportable Quantity (RQ) for spilled and released hazardous substances present in the product collected for reuse or recycle is:

Acetone (RQ) = 5000 lbs.

If spilled hazardous substances are collected for disposal, classify as hazardous waste and comply with the requirements of the applicable CERCLA hazardous waste RQ. Spills or releases in the US equal to or greater than the RQ must be reported to the National Response Center at 800-424-8802.

6.3. Methods and material for containment and cleaning up

Absorb spill with inert material and place in a chemical waste container. Dispose of in accordance with federal, state, provincial and local laws and regulations. Larger quantities: Remove mechanically (by pumping). Use explosion-proof equipment.

6.4. Reference to other sections

See Section 8 for exposure controls and personal protection.

SECTION 7: HANDLING AND STORAGE

7.1. Precautions for safe handling

Avoid contact with skin, eyes and clothing. Avoid breathing vapors, spray mists or sanding dust.

Wear solvent impermeable gloves, such as Neoprene or butyl rubber gloves recommended.

Wash thoroughly after handling.

In case of insufficient ventilation, wear suitable respiratory equipment.

Remove contaminated clothing and wash it before reuse.

Do not eat, drink, smoke or chew tobacco around material.

7.2. Conditions for safe storage, including any incompatibilities

Storage conditions: Store container at temperatures above 5 °C (40 °F) and less than 49 °C (120 °F). Keep out of the reach of children.

Incompatible products: Strong acids, strong bases, strong oxidizers.

Incompatible materials: *Chromic anhydride, chromyl chloride, hexachloromelamine, hydrogen peroxide, nitric acid and acetic acid, nitric acid and sulfuric acid, nitrosyl chloride, nitrosyl perchlorate, nitryl perchlorate, permonosulfuric acid, potassium tert-butoxide, thiodiglycol and hydrogen peroxide.*
